WEBSITE DEVELOPMENT PROPOSAL

Prepared for Inzmam

Hi Inzmam,

Thank you for the opportunity to work on your marketing website. Below is our complete proposal covering the pages, design direction, what is included, timeline, and pricing for your review.

Project Overview

We will design and develop a modern marketing website for your business. The design direction will follow the style, layout, and feel of banumukhtar.com — clean, professional, and easy to navigate — while being fully customized to reflect your brand, content, and services.

Pages Included

- 1. Home
- 2. About Us
- 3. Services
- 4. Portfolio
- 5. Contact Us
- 6. Privacy Policy
- 7. Terms of Service

What's Included

Design & Development

- Custom website design based on the reference style (banumukhtar.com), tailored to your brand colors, logo, and content.
- Fully responsive layout — optimized for desktop, tablet, and mobile devices.
- Development of all 7 pages listed above, with clean navigation and consistent branding throughout.
- Contact form on the Contact Us page connected to receive inquiries directly.
- Basic on-page SEO setup — proper page titles, meta descriptions, and clean URL structure.
- Fast-loading, modern build using industry-standard technology (Next.js frontend with Supabase backend).
- Deployment on Vercel with a live, production-ready website.

Support & Hosting

- One full year of monthly technical support covering bug fixes, minor content updates, and uptime monitoring.
- Vercel hosting management included in the monthly support.
- Supabase backend/database management included in the monthly support.
- Any server or infrastructure cost increase from Vercel/Supabase after year one will be communicated in advance, and monthly charges revised accordingly at that time only.

Investment

Item	Cost
One-time Website Development (7 pages, design + build + deployment)	PKR 25,000
Monthly Support (Vercel hosting + Supabase support, for 1 year)	PKR 8,000 / month

Note: Monthly support charges are fixed for the first year at PKR 8,000/month. If Vercel or Supabase increases their service costs after year one, we will revise the monthly charges accordingly and inform you in advance before any change takes effect.

Timeline

The website will be delivered within 6–10 business days from project kickoff and content/logo handover, including one round of design revisions before final delivery.

Payment Terms

- 50% advance to begin work, 50% upon completion and delivery of the website.
- Monthly support charges billed starting from the month after the website goes live.

If everything looks good, just confirm and we will get started right away. If you'd like any changes to the scope, pages, or pricing, let us know and we'll update this proposal.

Looking forward to working with you.
